

Cablcon's VFM® integrates fiber cable (up to 48 fibers) with fiber panels through a unique fiber delivery system, delivering a cost-effective, high-performance solution that reduces engineering, ordering, and installation time while accelerating deployment. Complementing this system, the Q6313-PWR1 Power Distribution Module provides a 12-position, two-piece terminal within a single adapter plate, accepting 10–24 AWG conductors. Its split design enables installation into the panel while terminating from the opposite side for improved efficiency, while a continuous cable-mount strip with screw-fastening hardware ensures secure, fixed placement.

Features

Q6313-PWR1

- 2-Position 2-Piece terminal accepting 10awg-24awg in a single adapter plate.
- 2-Piece terminal allows installer to load in VFM® while terminating opposite side for ease of installation.
- Continuous cable mount strip with screw fastening hardware for fixed installation.
