

ADVANCING A CONNECTED WORLD

Data Centre Cable Solutions

DATA CENTRE SOLUTIONS

We help you from the initial design phase through the construction of your data centre and into the post-build period for ongoing maintenance. At IEWC Cables, we provide comprehensive support and cable solution expertise tailored to your enterprise needs. Our extensive range includes LV/MV/HV & EHV cables compliant with British Standard, European Standard, and UL Standard specifications. We also offer LSZH cables for power, data, instrumentation, control, and fibre optic applications. Moreover, we provide customised lead assembly services to cater to your specific requirements. Whether you're setting up a colocation facility, managing critical power distribution, or enhancing your server room infrastructure, IEWC Cables is your trusted partner for data storage, managed services, and seamless connectivity in the cloud and hyper scale environments.

VALUE-ADD SERVICES

At IEWC Cables, we are more than just a cable supplier. Our value-add product services focus on safety and efficiency in order to save you time and money on-site.

We supply data centre designers, installers, critical power companies, and electrical sub-contractors with premium cut-to-length cables pre-equipped with connectors of your choice for effortless plug-and-play integration. Seamless and secure installation ensures time and cost savings.

With capabilities to help advance your company, we strive to be your most entrusted business partner. Value-added products expedite and streamline your business operations. IEWC Cable also provides comprehensive project management services and innovative call-off storage solutions, further enhancing your efficiency and operations.

Fast turnaround | Design & test | Managed schedules | Quality components | Fast delivery

FIBRE OPTIC CABLE ASSEMBLY MANUFACTURING

Cablcon's Cutting EDGE™ fibre optic solutions are innovative, best-in-class approaches to reliably achieving ultra-high fibre density inside the building. By reducing the fibre connectivity footprint in both the rack and the cable trough, you can maximize traffic and optimize your physical space, thus creating a strong return on your investment.

Our wide range of Cutting EDGE™ products are North American-made at one of our two ISO 9001 & TL 9000-certified manufacturing locations. Cablcon's outstanding on-time delivery performance keeps your project running on-schedule, while our commitment to meeting industry standards makes Cutting EDGE™ solutions reliable out of the box and for years to come.

YOUR EUROPEAN PARTNER

Fully managed storage, logistics, and distribution service tailor made to suit projects of any size throughout the whole EMEA region.

BEDFORD

Our European headquarter, just north of London. Access to all the major transport corridors across the UK via the M1/M4 corridors. With satellite offices in Birmingham, Bristol and Dublin, we are able to service the whole of the UK with rapid delivery options.

FRANKFURT

Our modern Frankfurt office and distribution centre are located just 20 minutes north of Frankfurt, centrally servicing all of our European customers and partners.

BELFAST

Located in the heart of the Belfast Docks, our offices and distribution centre service local businesses daily with a service counter and deliveries across the whole of Ireland.

QUALITY CERTIFICATIONS

WHO WE ARE

IEWC is an entrusted partner to those who build the essential products and infrastructure of our connected world, providing high-quality cable and fiber solutions to original equipment manufacturers, contract manufacturers, assemblers, and installers.

Global Distribution

IEWC's global inventory of cable means you get the right material at the right time to ensure your production lines and job sites remain up and running.

WHAT WE DO

We help businesses accelerate and simplify their business while connecting them to new opportunities. Together, we advance a more innovative, reliable, and connected world.

Customized Solutions

IEWC provides custom cables, fiber assemblies, kits, and build-outs so your personnel can focus on higher value production and service efforts.

ADVANCE YOUR BUSINESS

Improve and grow your business with an entrusted partner. Our experienced team will help you advance your business by providing fresh perspectives to identify opportunities to increase efficiency or uncover hidden problems.

OUR SUPPLIER PARTNERS

WORLDWIDE SUPPLY CHAIN

IEWC provides cable for every use with a range of product materials, specifications and constructions to meet any environmental, mechanical or electrical needs.

IEWC is able to source from numerous trusted suppliers in order to meet your standard or custom cable requirements.

OUR PARTNERS

We work with the most highly-regarded suppliers of cable and cable management products in the world, and are the distributor-of-choice to some of the most admired companies in the world, across countless industries.

GLOBAL RESPONSIBILITY

As a global community, we must mitigate human impact and preserve natural resources. IEWC embraces this responsibility by proactively reducing our carbon footprint and energy use while inspiring others to build a sustainable future.

Electronic Transactions

- 79% digital SAP output transactions (initiating a paperless warehouse project in 2025-2026)
- 44.3% supplier transactions transmitted via EDI

Sustainability & Energy Management

- 58% of sq. ft. has LED lighting, resulting in 50% reduction of energy consumption
- 1,362 metric ton CO₂ emission reduction in 2024 due to copper, pallet, spool, carton & plastic recycling
- 460 metric tons of CO₂ emission reduction in 2024 due to reduction in air/ocean, LTL and parcel shipments through freight consolidation and fewer air shipments
- 46% purchases from suppliers with sustainability programs to reduce carbon footprint
- Recognized suppliers with best sustainability initiatives at annual IEWC supplier conference
